

BRUSHES AND COMBS

PROCEDURE:

1. Monitor each resident to assure that they have their own personal brush or comb.
2. If they don't have their own, obtain one from the facility's Central Supply.

CLEANING:

1. Remove any hair and debris after each use.
2. To clean periodically, place a small amount of shampoo on the comb or brush and scrub until there is a lather.
3. Rinse thoroughly and place them back in the resident's night stand.
4. Always keep individual resident's combs and brushes separate.
