

VISITING HOURS

PURPOSE:

1. To have open visiting hours for all residents unless the individual patient's condition contraindicates visiting. The decision to restrict visiting hours will be made by the resident's attending physician, the DON, Assistant DON (where applicable), or Clinical Director and will be noted in the care plan.
2. Families including children, grandchildren, and pets are encouraged to visit as often as possible.
3. Restrictions to visitation may be made if the visitation is disruptive to the resident's roommate or other residents of the facility.
